

a passion to inspire

Optik

Optik

Optik uses innovative embossed modeling to interact with how light plays across the surface of each piece. The new Wide Rim plate achieves an exciting balance between a smooth central area, which cossets the food in a tantalizing interplay of light and shadow which frames it.

Optik is particularly successful when deployed in bold strokes. The accentuated rim area makes for a contemporary and elegant statement, which highlights the care and skill that has gone into the preparation of the dish.
